Schneedetektion Datenbank Setup

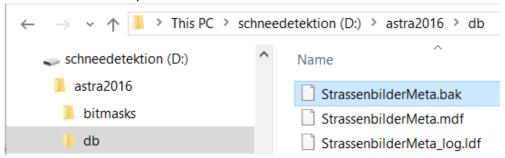

SourceCode: https://github.com/uzapy/ch.bfh.bti7321.w2016.schneedetektion

1. Mit SQL-Server Datenbank verbinden

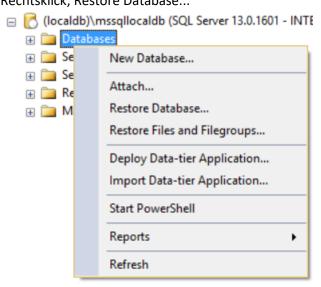

Beispielsweise auf den lokalen SQL-Server (localdb)\mssqllocaldb

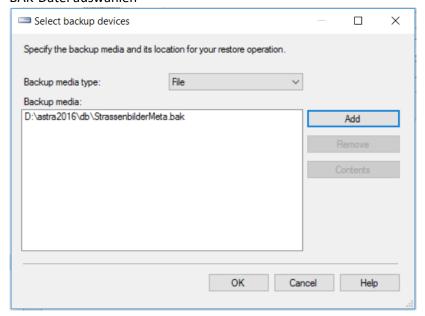

BAK-Datei auf Memorystick lokalisieren:

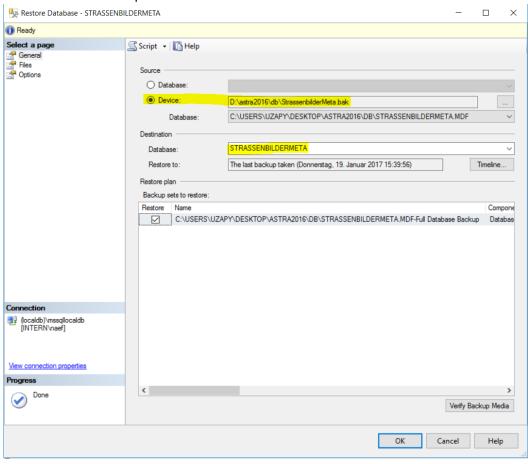

2. Backup ein Datenbank einspielen Rechtsklick; Restore Database...

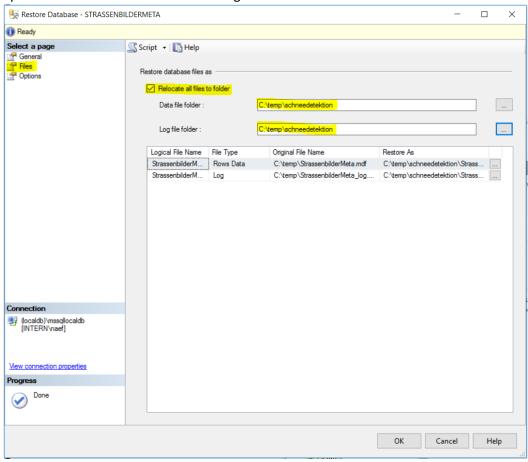

3. BAK-Datei auswählen

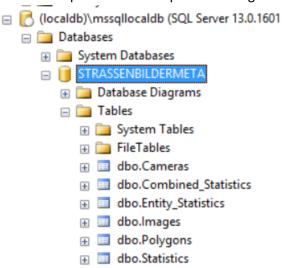

4. Datenbank-Namen anpassen

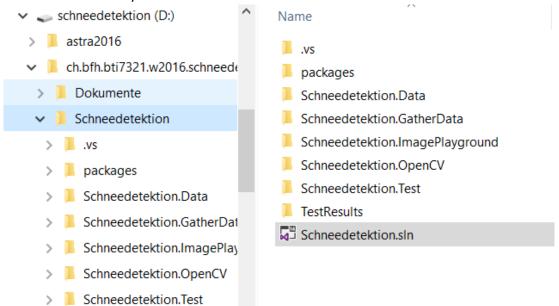

5. Speicherort der Datenbank-Dateien angeben:

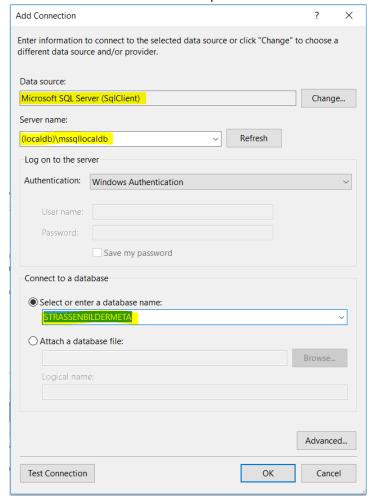

6. OK. Das Einspielen des Backups kann eineige Minute dauern. Die DB ist 8GB gross.

7. Solution vom Memory Stick in Visual Studio 2015 öffnen

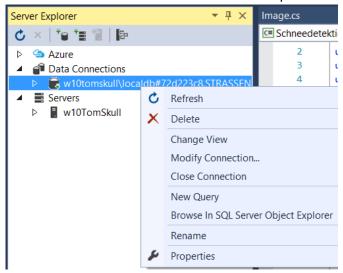

8. Visual Studio => View => Server Explorer => Connect to Database

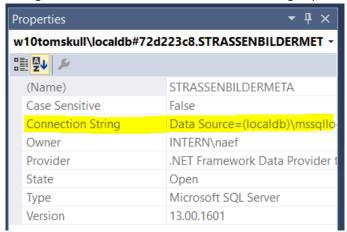

Data Source: Microsoft SQL Server (SqlClient)

Server Name: (localdb)\mssqllocaldb Database Name: STRASSENBILDERMETA 9. Rechtsklick auf verbundene Datenbank => Properties

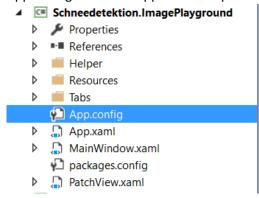

10. Im Eigenschaften-Fenster den Connection-String kopieren:

Data Source=(localdb)\mssqllocaldb;Initial Catalog=STRASSENBILDERMETA;Integrated Security=True

11. App.Config-Datei der Applikation anpassen:

12. ConnectionString (Datenbankverbindung) und WorkingFolder (Speicherort des Bildarchivs).

```
<?xml version="1.0" encoding="utf-8" ?>
           <configSections>
                                       <sectionGroup name="userSettings" type="System.Configuration.UserSettingsGroup, System, Version=4.0.0.0, Culture=neutral, Pi</pre>
                                                  <section name="Schneedetektion.ImagePlayground.Properties.Settings" type="System.Configuration.ClientSettingsSection, System.Configuration.ClientSettingsSection, System.Configuration.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSettingsSection.ClientSett
                                      </sectionGroup>
                           </configSections>
                        <startup>
                                        <supportedRuntime version="v4.0" sku=".NETFramework,Version=v4.6.1" />
                          </startup>
10
11 = 12 = 1
                         <connectionStrings>
                                      <add name="Schneedetektion.Data.Properties.Settings.StrassenbilderMetaConnectionString"</pre>
                                                   connectionString="Data Source=(localdb)\mssqllocaldb;Initial Catalog=STRASSENBILDERMETA;Integrated Security=True" />
13
                        </connectionStrings>
14
 15
                        <userSettings>
                               16 =
17 =
                                                               <value>D:\astra2016</value>
18
 19
                                                    </setting>
                                      </Schneedetektion.ImagePlayground.Properties.Settings>
21
                          </userSettings>
            </configuration>
22
```

Achtung: Je nach Computer ist die Laufwerksbezeichnung (D:\) unterschiedlich!

- 13. Bei Bedarf die Konfigurationsdateien in den anderen Projekten analog anpassen:
 - a. D:\ch.bfh.bti7321.w2016.schneedetektion\Schneedetektion\Schneedetektion.Data\app.config
 - b. D:\ch.bfh.bti7321.w2016.schneedetektion\schneedetektion\schneedetektion.gather data\app.config
- 14. Applikation builden und Starten
